

“Why Not Wye?”

Petition to David Solow, CEO, SCRRA dba Metrolink
We are concerned citizens & riders of Metrolink trains and their friends and families.

Turning the trains, using a “wye” so that the locomotives are always in front pulling the passenger cars, seems to be a much safer way to run the train considering there are 785 grade crossings and 10s of millions of vehicles in Southern California

Give a “Wye” for the lives and safety of our families and friends.
